

## **ABOUT US**

For us at Amber Initiatives, the main area of work is Information, Advice and Guidance service for migrant workers from Eastern Europe and other EU countries. Amber Initiatives works with young people organizing different activities in frame of Youth in Action/Erasmus+.

Amber Initiatives is the organization with a successful long-term experience in non-formal education. The company works on European level, and implemented projects in the fields of youth and adult education, focusing on civic education, motivation, active citizenship and personal development of children, young people and adults from disadvantage background.

The company is actively promoting the awareness of European values and the opportunities available on the wider European level, namely the mobility opportunities, anti-discrimination practices and awareness of existing EU citizenship rights among general public.

## **ABOUT THE PROJECT**

### **Support for Children with Special Educational Needs**

Amber Initiatives offers a training course in Plymouth, UK. This 10 days course is ideal for those working in school education. Teaching children with special educational needs (SEN) will present teachers with some unique and distinctive challenges. These students will demand more of teacher's time and patience as well as they require specialised strategies in a structured environment to support and enhance their learning potential. Children with SEN need differentiated approach tailored to their distinctive learning abilities.

The training we offer aims to equip the participants with knowledge and skills to address the needs of children better, using new strategy and putting new ideas into practice.

The training provides a detailed overview on the UK education system and support of children with special needs in UK school.

Participants will explore effective ways of working, learn from the experience of their UK colleagues and share ideas with other participants.

The participants will increase their knowledge how UK schools provide emotional support, use play therapy and other methods.

The training will outline the problems and concerns faced by parents of young people with SEN and will focus on how schools can help to address these and work with students and families.

## **LEARNING MODULES**

- UK educational system
